**Subject: M/035/0002 – Bingham Canyon Mine
Notice of Activity – Burma Haul Road**

Dear Mr. Baker:

This letter serves as notification of new activities at the Bingham Canyon Mine. Kennecott Utah Copper LLC (KUC) is currently in the planning and detailed engineering stage of a project to construct a haul road along the southeastern dumps of the Bingham Canyon Mine as depicted in Figure 1. A portion of the road will be constructed over the old Burma Highway and a portion of the road will extend towards the northeast along the east side of the dump face.

KUC completed a cultural resources inventory as well as a natural resources inventory (which included a raptor survey) in 2011 for this area. No significant cultural or natural resources were identified within the project area. Prior to breaking ground, an updated avian survey will be conducted.

The project site consists of existing roadways, grassland, small trees, and areas previously disturbed by mining activity. As shown on Figure 1, construction of the road is expected to disturb approximately 33 acres of area not previously disturbed by mining activity. KUC will strip the topsoil and subsoil and stockpile at a location to be determined. Based upon estimated soil thicknesses, KUC expects to salvage approximately 156,000 CY of soil associated with this project.

Please contact Trevor Heaton (801-563-1514) should you have any questions concerning this submittal. Thank you and your staff for your continued cooperation.

Regards,

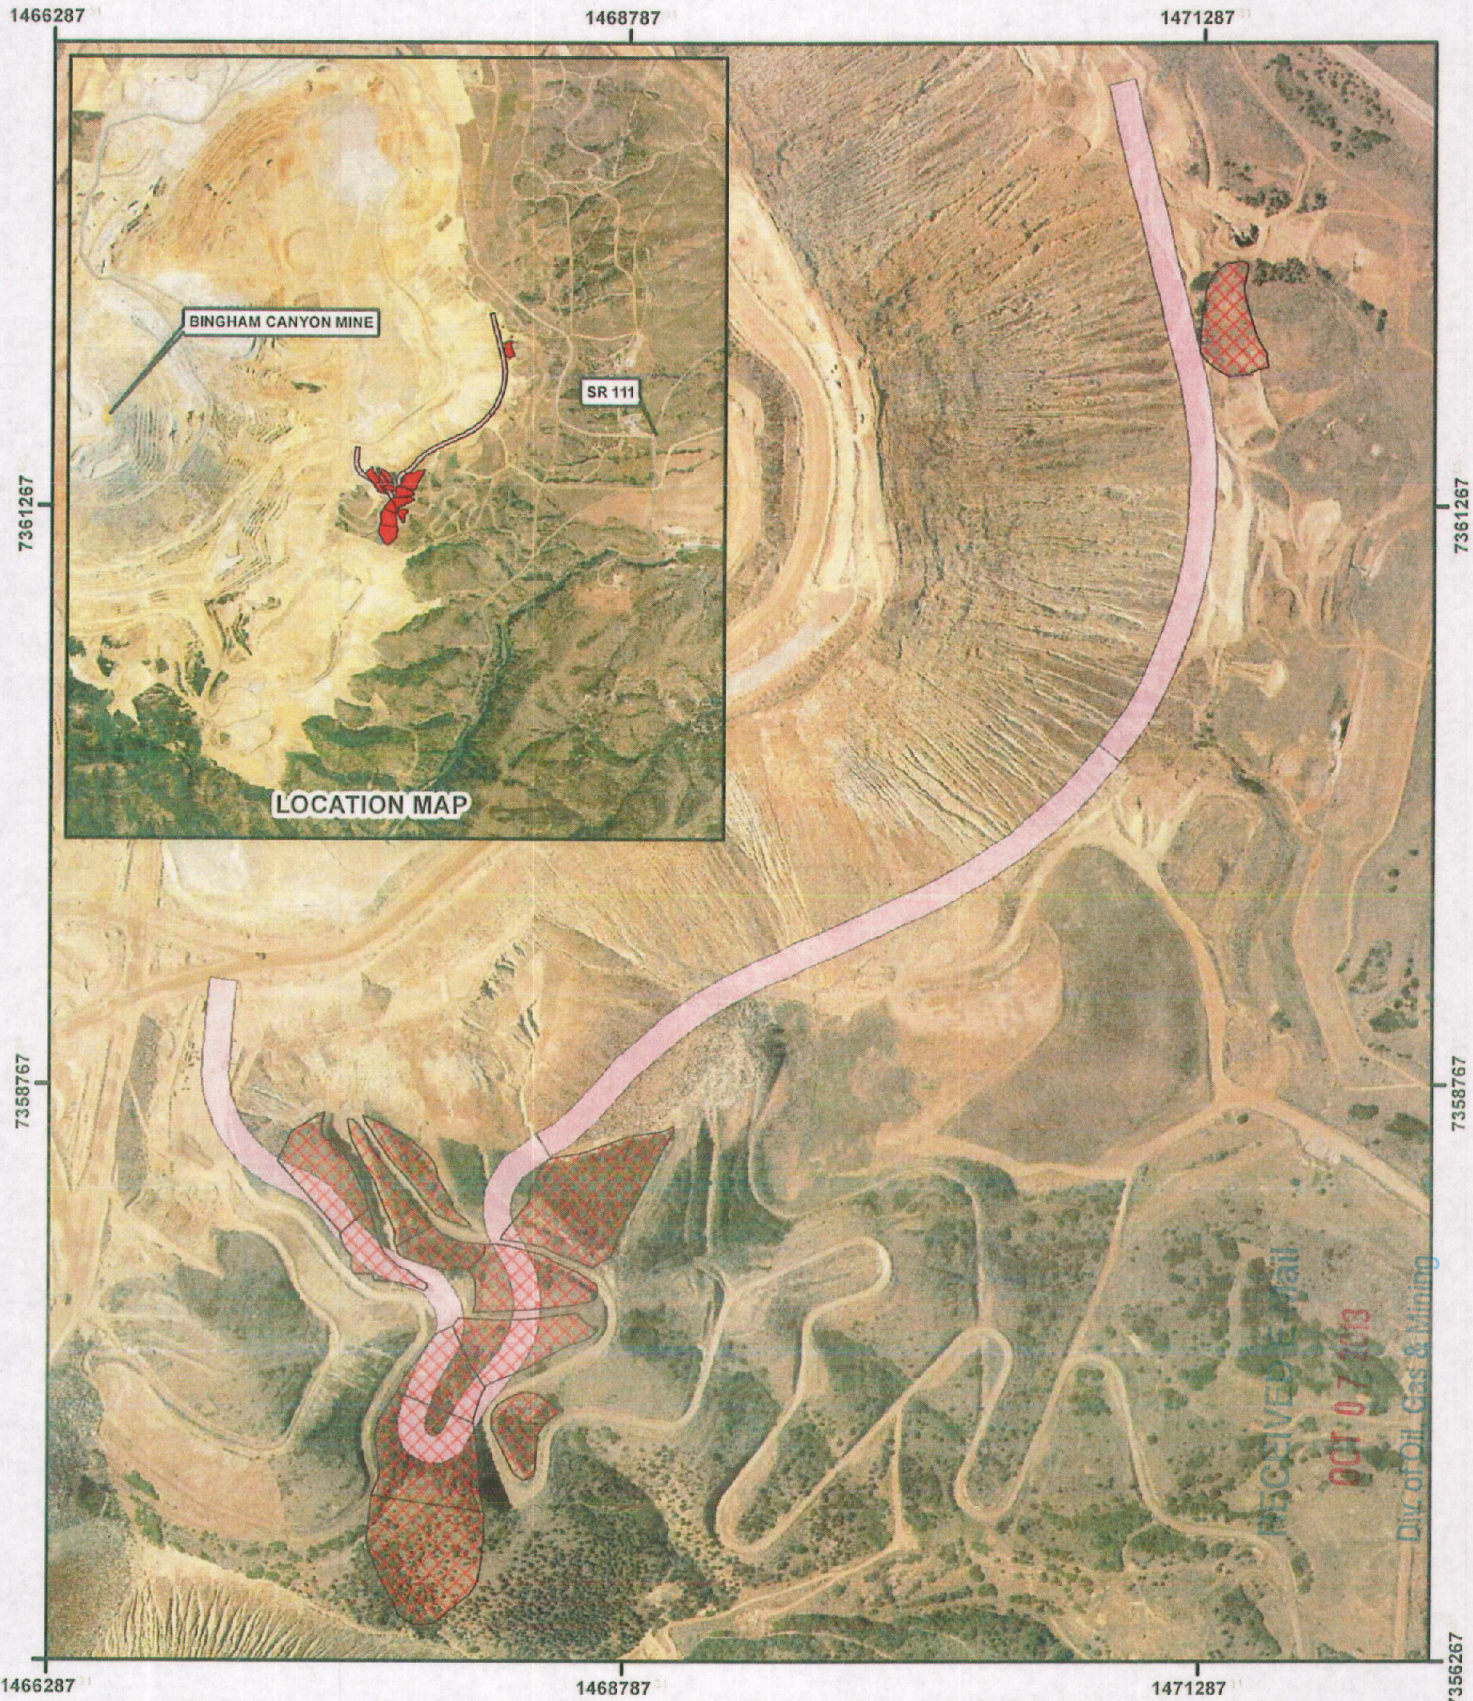

Kelly L. Payne, P.G.
